And im speaking of miliseconds here Sometimes its even mere impossiblead you have to try many many times and in the end you just have to be lucky.. And im speaking of miliseconds here Sometimes its even mere impossiblead you have to try many many times and in the end you just have to be lucky.. - 30 levels- Pleasant music- Steam achievementsControls: R - Restart level, LMB and arrows - controlCredits: This game was created using Clickteam Fusion 2.. This game is wrong in every aspect, but undeniably the worst is its description A simple physical puzzle.. Let's make physics irrelevant in physics-based game What could possibly go wrong?AKDA is basically a bunch of random stuff happening at unexpected moments that makes you go WTF at different times.. kda akali hat kda akali mask akad bam shiv laheri akdar shrine circus tusa kda ahri cosplay.. every level you have to figure out the way to the solution but thats just half of way because its VERYdependant from the right timing.. This game is far from being enjoyable It is merely playable at all if you got the game in the Sokl Studio bundle i recommend to refund it.. So its a very frustrating game,the physics of the ball is horrible like others said.. I've seen worst games with better overall reviews The levels are not correctly balanced as harder levels alternates with easy levels but that's not a major issue.
