Rocksmith 2014 Pc

[Rocksmith 2014 Pc](#)

Configuring Your Rocksmith Real Tone CableThe game requires you to have a Rocksmith Real Tone Cable in order to play.. LatencyBuffer [default: 4] - This value allows you to adjust one of the audio buffers used in one area of the Rocksmith 2014 audio engine.. It will trade some of the latency improvements we've made for Rocksmith 2014 but should give better quality audio on low end machines.

Other video settings are controlled on the Advanced Display Settings menu, also accessed via the options menu.. This forces the game to use an old Windows mechanism to control your audio devices.
